Teaching Learning to Learn: An Online Institute

Improving Teaching, Learning, and Student Success through the implementation of Process Education.

For institutions or individuals interested in converting from a traditionally-oriented classroom (whether physical or virtual) to one that is learner and learning-centered, this event offers you the opportunity to grow and develop as an educator. Participants actively take part in a learning community that mirrors a Process Education™ classroom. You'll complete each 12-week level of this event with renewed enthusiasm for teaching and a strong motivation to mentor the growth of your students and yourself.

Participant Benefits:

1. Develop an understanding of an instructional design process that supports active learning, critical thinking, and assessment.
2. Learn to value the importance of self-assessment in the growth process and identify ways to make better use of specific assessment tools.
3. Act as researchers, deciding which strategies, tools and techniques might work well (or not) in different learning environments.
4. Observe and learn the professional practices of a process educator from the perspective of a student: analyze, learn, & apply new material.

Cost (per part):

Individual: $395 per participant
Team: $1000 for 3 participants from the same institution
Institution: $250 per person (for 30 participants)

Registration: https://fs20.formsite.com/pacificcrest/form58/index.html

Next Start Date: Level 1 May 15 (Contact us to schedule a Teaching Learning to Learn Institute)
